Case ID: MCU-001
Reference: AR-001
Classification: Homicide

POST-MORTEM / AUTOPSY REPORT

1. SUBJECT DETAILS

Name: Lena Varga
Age: 27
Sex: Female
Date of Examination: 15/03/2026
Examiner: Dr. Helen Carter (Chief Forensic Pathologist)

2. EXTERNAL EXAMINATION

The body is that of a well-nourished adult female. No signs of defensive injuries observed.
A minor contusion is present on the right temporal region of the head, consistent with blunt impact.
No additional external trauma identified.

3. INTERNAL EXAMINATION

Internal examination reveals no structural trauma sufficient to cause death.
Cardiac examination indicates irregular rhythm patterns consistent with toxicological interference.
No evidence of internal hemorrhage or physical assault.

4. TOXICOLOGY FINDINGS

Laboratory analysis confirms the presence of aconitine within the bloodstream at lethal concentration.
Substance distribution indicates oral ingestion prior to collapse.

5. ESTIMATED TIME OF DEATH

Between 19:00 – 19:20 on 14/03/2026.

6. CAUSE OF DEATH

Acute cardiac arrest due to aconitine poisoning.

7. CONCLUSION

The observed head injury is consistent with a secondary impact sustained during collapse.
Primary cause of death is poisoning. Findings are inconsistent with accidental or natural causes.
Conclusion: Death is the result of deliberate administration of a toxic substance.

Signed:
Dr. Helen Carter
Chief Forensic Pathologist
