Case ID: MCU-001
Reference: TX-001
Classification: Homicide

TOXICOLOGY REPORT

1. SUBJECT DETAILS

Name: Lena Varga
Age: 27
Date of Analysis: 15/03/2026

2. SAMPLE INFORMATION

Samples Received:
- Blood sample
- Gastric contents
- Residue from ingested substance

3. TOXICOLOGY RESULTS

Aconitine detected in all submitted samples.
Measured concentration within confirmed lethal range.
Distribution consistent with recent oral ingestion.

4. ANALYSIS

Aconitine is a highly toxic alkaloid derived from Aconitum (Monkshood).
The substance interferes with cardiac sodium channels, causing rapid arrhythmia and cardiac arrest.
Onset of symptoms is typically rapid following ingestion.

5. FORENSIC CORRELATION

Substance detected matches compound identified in:
Supplement analysis report (E-11)
Associated digital and financial records under active review (E-12)

6. CONCLUSION

Findings confirm fatal aconitine poisoning.
Concentration and distribution indicate deliberate administration.
Results are consistent with cause of death established in autopsy report.

Signed:
Dr. A. Whitmore
Forensic Toxicologist
Metropolitan Police – Forensic Toxicology Unit
